Re: Petroleum contamination at Black Mountain Trailer Park (Site # 94-1583)

Dear Mr. Gallagher:

The Sites Management Section (SMS) has received the summary letter submitted by C.A.B. Services dated April 27, 1994 regarding the initial cleanup at the above referenced site. Based on the limited information provided in this letter, the SMS has concluded the following:

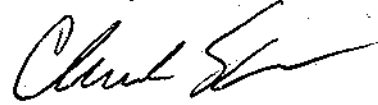

1. A release of approximately 150 gallons of kerosene occurred at the Black Mountain Trailer Park on March 24, 1994.
2. On March 28 - April 1, 1994, C.A.B. Services were on site to provide initial cleanup services. In this effort, approximately 75 cubic yards of soil was excavated and stockpiled on site. Residual contamination remains in the ground, despite this removal effort.
3. The identification of sensitive receptors was not completed during this assessment.

Based on these findings, the SMS requests the following work be completed by a qualified consultant:

1. Define the degree and extent of soil and groundwater contamination remaining in the ground at this site.
2. Identify the potential receptors that could be affected by this contamination.
3. Develop and implement a plan to treat and dispose of the stockpiled soils.
4. Prepare and submit a detailed summary report which includes the information above, as well as providing a more complete summary of the work completed in the initial cleanup.

The SMS appreciates your quick response to this situation.

Sincerely,

A handwritten signature in black ink, appearing to read "Chuck Schwer", with a stylized flourish at the end.

Chuck Schwer, Supervisor
Sites Management Section
